EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- In claim 21, line 3, please delete the word 'lest', and replace with –least--, therein.

The following amendment was made to correct a minor typographical error.

2. Claims 1, 3-4, 8-15, 17, 19, and 21 are allowed. The prior art of record fails to teach a dumbbell including a handle element having a holder at one end which is open in order to receive weight disks and further comprising a swiveling locking element acting radially on the weight disks on their outer circumference for locking the weight disks. Chang (U.S. 5,250,014), Adams (U.S. 5,509,877), and Mattox (U.S. 5,879,274) teach examples of prior art dumbbells that fail to teach holders at the end of handle elements including a swiveling locking element acting radially on the outer circumference of weight disks. Sreter (U.S. 5,180,352) teaches an example of a device including an outer holder receiving a weight element, but fails to teach either a swiveling lock, or a recess on the interior of the casing in which the weight member is received.
